SUMMARY

I'm a Java Developer with a PG Diploma in Advanced Computing and Bachelors in Mechanical Engineering with strong foundation in object-oriented programming, data structures, software development. Also having hands-on experience in Java, Spring Boot, Hibernate, Microservices, JavaFX, etc. with focus on clean design, performance, and user experience.

SKILLS & COMPETENCIES

Java, OOP, JPA, JDBC, Servlet, Hibernate, Microservices, Spring, Spring Boot, Spring Data JPA, Spring Security, OAuth, JWT, Junit, REST API, Collection API, ORM, WebSocket, Maven, Gradle, JavaFX, HTML, CSS, Python, JavaScript, Git, GitHub, Docker, Postman, SQL, MySQL, Apache Cassandra, PostgreSQL, MongoDB, React.js, Linux.

PROJECTS

Accent (Personal) | [Link](#)

It is a windows desktop application for changing system accent from system tray of windows taskbar without going into system settings.

- This application is created in Java on JavaFX platform using maven build tool.
- It uses PowerShell registry editing via script, which can change the system wide accent just in a click.
- very simple to use, just run the jar file and in system tray on windows taskbar, click on Toggle Dark / Light Mode.
- *Technologies used:* **JDK 21, JavaFX 21, Maven, Git, GitHub, etc.**

Echo (Personal) | [Link](#)

Echo is a messaging application designed for secure one to one and group real-time communication.

- Developed a messaging web application using Java enabling real-time messaging using WebSocket protocol.
- Spring Boot framework is used for backend and Spring Security is used for securing the application and for Authentication and Authorization JWT is used.
- A responsive UI with HTML, CSS, JavaScript and integrated MySQL, Cassandra DB for efficient storage and retrieval of user data, chat data, improving data access speed and supporting robust user authentication and message history features.
- *Technologies used:* **JDK 25, Spring Boot, Spring Security, MySQL, Cassandra DB, Maven, WebSocket, Git, GitHub, etc.**

The Event Manager (Academic) | [Link](#)

The Event Manager is event management web application for planning and booking the events in various cities across the India.

- Event management a REST web application to simplify the planning and organization of events.
- Worked with a group of seven students as backend developer and managed coordination between mentor and students, also coordination between frontend team and backend team.
- *Technologies used:* **JDK 11, Spring Boot 2.5.4, ReactJS 17.0.2, MySQL, REST APIs, Maven, Git, Postman, GitHub, etc.**

EDUCATION

POST GRADUATE DIPLOMA IN ADVANCED COMPUTING (PG-DAC)

Center for Development of Advanced Computing (C-DAC), Hyderabad - 60% - Feb 2024

BACHELOR OF ENGINEERING - MECHANICAL ENGINEERING (BE-Mech.)

M. S. Bidve Engineering College, Latur - 77% - May 2021

PERSONAL DETAILS

Languages: English proficient, Marathi native, Hindi proficient
